

7 Mistakes That Could Be Costing You Money Every Time You Use Crypto

A practical guide for cryptocurrency users in Ghana

This guide is educational and is designed to help you make safer, smarter financial decisions when using cryptocurrency. Never share your recovery phrase or private keys.

1. Accepting the First Exchange Rate

Compare multiple offers before accepting one. Small differences in rates can add up over time.

2. Ignoring the Total Cost

Look beyond the exchange rate. Include network fees, service charges and payment fees.

3. Trading With Someone You Don't Trust

Verify the person or platform before sending money. Keep transaction records.

4. Rushing Because of Urgency

Scammers often create pressure. Slow down and verify every detail.

5. Depending on Only One Cash-Out Method

Having alternative ways to access your money reduces risk and improves flexibility.

6. Failing to Keep Records

Save receipts and transaction IDs to resolve disputes and track your finances.

7. Never Comparing Better Options

Review new services occasionally. Better pricing, speed or security may become available.

Quick Checklist

- Compare rates.
- Understand all fees.
- Verify who you are dealing with.
- Double check payment details.
- Keep proof of every transaction.
- Never share your recovery phrase or private keys.

The objective is simple: move your money safely, efficiently and confidently.
